

COMPANY PROFILE

EAIGLE is a human-centric AI company developing enterprise computer vision solutions for the workplace and public spaces.

Trusted by top tier enterprises including:

RETAIL

PHARMACEUTICAL

MUNICIPALITY

CRE

MEAT PROCESSING

MANUFACTURING

Recreation

FOOD & BEVERAGE

HEALTHCARE

What We Do

Patented AI software that analyzes optical, thermal and radar data to provide operational intelligence.

Strategic Verticals We Serve

- Commercial Real Estate
- Retail
- Manufacturing
- Logistics

Saving our customers

US\$500,000
on average, per year,
per facility

Health & Safety Solutions

Example 1: Early Smoke Detection

Using existing security cameras, our AI sends you alerts when smoke is detected and before smoke sensors are activated.

Our customers love this solution because it helps them avoid work interruptions and potential fire damages.

Example 2: Emergency Exit Blockage Detection

With our AI technology and your existing security cameras, we send you alerts when emergency exits are blocked.

Our customers love this solution because it helps them create a safer facility and avoid fines and charges.

Density Measurement Solutions

Example: Public Spaces in Multi-Use Buildings

Our AI uses existing cameras to tell you how public spaces (i.e. food court) are being used, when to dispatch cleaning crews and whether you should spend on adding more seating or remove part of the seating area to add more food outlets.

Process Optimization

Example: Public Washroom Cleaning On-Demand

Using anonymous radar sensors installed inside the washrooms, we can tell you how many people have used the washrooms and when cleaning is needed. Our AI helps you schedule cleaning crews when they are needed.

Security Solutions

Example 1: Loitering and Trespassing Detection

Using existing security cameras, our AI can tell your security crew when someone is in an area they shouldn't be in.

Our customers love this solution because it maximizes the efficiency of their security crew, making the facility more secure.

Example 2: Vandalism Detection

When your brand icons are tarnished by someone unruly, our AI can help you take immediate action to clean up the mess before anyone notices.

Using a camera installed in the desired places on your property, our AI detects vandalism and instantly sends you an alert.
