

# RETAIL OF THE FUTURE

EAIGLE is a human-centric AI company developing enterprise computer vision solutions for the workplace and public spaces.

## What We Do

Patented AI software that analyzes optical, thermal and radar data to provide operational intelligence.

## Strategic Verticals We Serve

- Retail
- Logistics
- Distribution Centres
- CRE

Saving our customers

**US\$500,000**  
on average, per year,  
per facility

### PROCESS OPTIMIZATION SOLUTIONS

## Automated Visitor & Vendor Management

Our Visitor & Vendor Management Solution automates the inbound and outbound registration and sign-in/out processes for visitors and vendors, enables pre-registration, and provides digital or printed entry passes.

Our customers love this solution because it helps them keep digital records of visitor and vendors' entry, and verifies vendor commitments and compliances while keeping data secure and private.

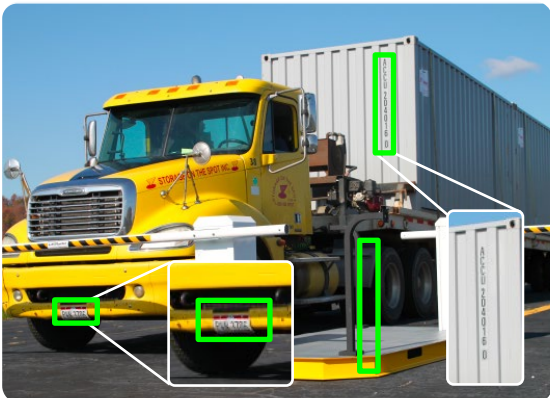

### PROCESS OPTIMIZATION SOLUTIONS

## Automated Vehicle Access Control (VAC)

Our AI can use existing security cameras to read vehicle license plates and trailer barcodes to allow entry and exit for registered vehicles by integrating with your VAC. Our solution also automates the vehicle pre-registration process, accelerating truck throughput.

Our customers love this solution because it helps them keep digital records of trucks and drivers' data while keeping it secure and private.

**\$3M+**  
Cost-saving Opportunity  
Direct labour cost saving per year, per store

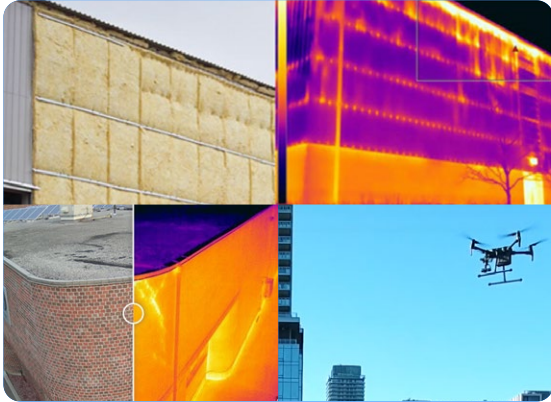

PROCESS OPTIMIZATION SOLUTIONS

## Loading Dock and Truck Parking Monitoring

By leveraging your existing security cameras, our AI can show you the availability of loading docks and parking spots in real-time, making it possible for truck drivers to quickly navigate to their desired location within your facility.

Our customers love this solution because it helps them optimize the loading and unloading process for drivers.

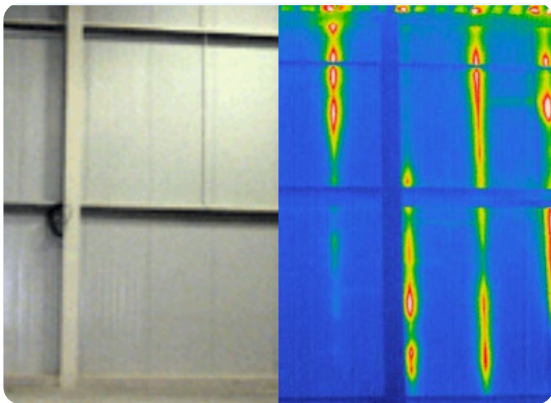

SUSTAINABILITY IMPROVEMENT SOLUTIONS

## Building Envelope Inspection by Drone

Using a drone equipped with thermal cameras, our AI monitors your building insulation, identifying energy loss and moisture damages.

Our customers love this solution because it helps them reduce maintenance and operational costs.

SUSTAINABILITY IMPROVEMENT SOLUTIONS

## Storage Fridge and Freezer Performance Monitoring

Using a thermal camera, our AI monitors the temperature distribution and the performance of fridges and freezers and sends you alerts when there is a sudden temperature change.

Our customers love this solution because it helps them maintain product shelf life, minimize product loss, and avoid energy loss.

**We are looking forward to learning about your top operational challenges and to explore which EAIGLE solutions align with your AI strategy.**
