13 AI SOFTWARE PATENTS

What's unique about EAIGLE

- Hardware Agnostic
- Superior AI Accuracy
- Optical, IR, and Radar Feed

Our Solutions

- Density Measurement
- Security
- Process Optimization
- Health & Safety

Saving our customers

US$500,000
on average, per year, per facility

Density Measurement Bundle

Office Space Utilization Solutions

Our patented AI tech analyzes anonymous data from radar, and infrared sensor feed to create real-time heat maps of how people use the office space.
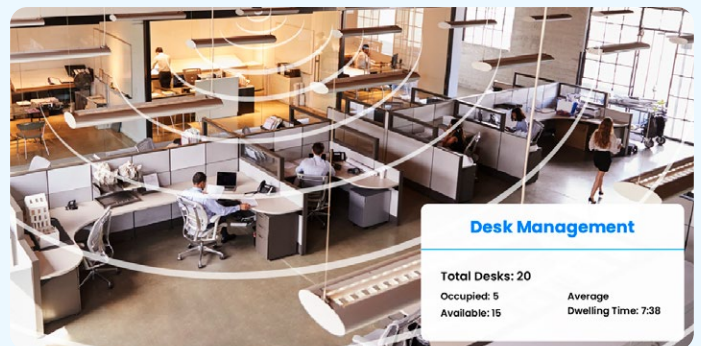

Our customers love this solution because it helps them better understand how to optimize usable office space to maximize the value for their tenants, all while protecting their privacy and safeguarding personal data.

Desk Utilization Solutions

Our AI leverages radar sensors with up to 50 desk coverage to generate desk utilization insights based on anonymous real-time data.

Our customers love this solution because it helps them understand desk usage patterns and peak times. These insights help managers make data-backed workplace management decisions while reducing maintenance costs.

Desk Management

Total Desks: 20
Occupied: 5
Available: 15
Average Dwelling Time: 7:38

Density Measurement Bundle

Public Amenity Space Solutions

Example 1: Public Food Court

Our AI uses existing cameras to tell you how the food court is being used, when to dispatch cleaning crews and whether you should spend on adding more seating or remove part of the seating area to add more food outlets.

Example 2: Public Washrooms

Using anonymous radar sensors installed inside the washrooms, our AI can tell you when to schedule cleaning crews based on how many people have used the washrooms.

Security Bundle

Access Control Solutions for Visitors, Contractors, and Packages

To ensure only the right people get into your facility, we developed a robust check-in and check-out software housed in a heavy-duty kiosk. The system automates the registration process for employees, visitors, contractors, and packages. For added security, the system comes with the capability to integrate with your access control system to unlock doors. The software also enables pre-registration and provides digital or printed entry passes when required.

Our customers love this solution because it helps them keep digital records to avoid liability and incompliance consequences while keeping data secure and private.

Access Card Reader

Barcode Scanner

Printer

Hand Sanitizer

Loitering and Trespassing Solutions

Using existing security cameras our AI can tell your security crew when someone is in an area, they shouldn't be in.

Our customers love this solution because it maximizes the efficiency of their security crew, making the facility more secure.
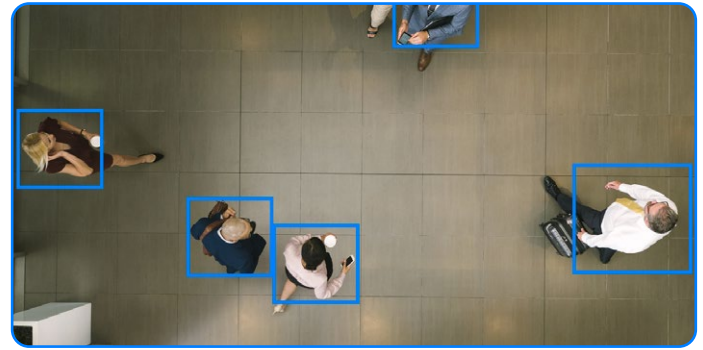

Health & Safety Bundle

Capacity Monitoring Solutions

Using existing security cameras, our AI can tell you in real-time how many occupants are inside the facility.

Our customers love this solution because it maximizes the occupants' safety by ensuring no one is left behind during an emergency and helps them avoid potential liability costs.

Emergency Exit Blockage Solution

With our AI technology and your existing security cameras, we send you alerts when emergency exits are blocked.

Our customers love this solution because it helps them create a safer facility and avoid fines and charges.

Energy Management

Lighting and Demand Controlled Ventilation Solutions

Using existing security cameras, our AI can automate lighting based on where people are, and the ventilation systems based on real-time occupancy numbers.

Our customers love this solution because it helps them reduce the energy costs while maximizing occupant comfort levels.

We are looking forward to learning your top operational challenges and to explore which EAIGLE solutions align with your AI strategy.
