

RETAIL OF THE FUTURE

EAIGLE is a human-centric AI company developing enterprise computer vision solutions for the workplace and public spaces.

What We Do

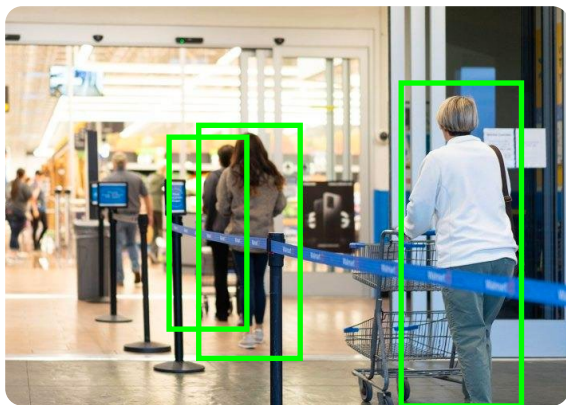

Patented AI software that analyzes optical, thermal and radar data to provide operational intelligence.

Strategic Verticals We Serve

- Retail
- Distribution Centres
- Logistics
- CRE

Saving our customers

US\$500,000
on average, per year, per facility

DENSITY MEASUREMENT SOLUTIONS

Footfall Traffic Insight

Using existing security cameras and integrating with your POS systems, our AI provides you with analytical data and insights on the number of people that have entered your facilities and compares it to the actual number of sales.

Our customers love this solution because it helps them understand their busiest locations, days, and hours, and receive data on sales conversion rates.

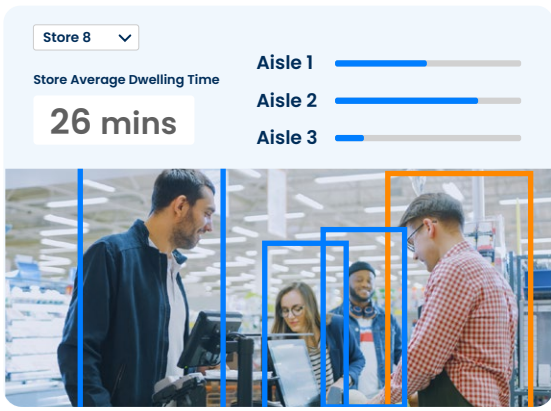

DENSITY MEASUREMENT SOLUTIONS

Occupancy Heat Map

Leveraging our AI technology and your existing security cameras, we create a real-time heat map based on the movement of people, providing you with actual data on how shoppers move within your store.

Our customers love this solution because it helps them arrange store items based on actual data.

DENSITY MEASUREMENT SOLUTIONS

Dwelling Time and Queue Monitoring

Using existing security cameras, our AI tells you how long people have spent time shopping inside your stores and waiting in the lines and provides you with insights about line abandonment.

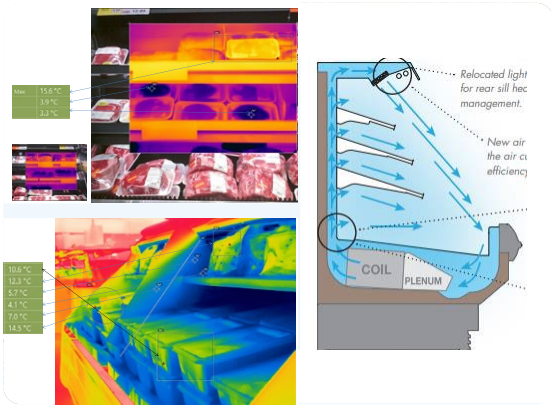

INVENTORY MANAGEMENT SOLUTIONS

Store Shelf Management

By leveraging your existing security cameras, our AI sends you alerts when items are misplaced and before they become unavailable on shelves.

Our customers love this solution because it helps them gain insights into inventory levels and shopping trends, while ensuring products are always available for customers.

SUSTAINABILITY IMPROVEMENT SOLUTIONS

Air Curtain and Fridge Performance Monitoring

Using a thermal camera, our AI monitors the temperature distribution and the performance of air curtains and fridges and sends you alerts when there is a sudden temperature change. It also monitors the temperature of refrigerated items and sends you warnings in case their temperature changes to an unexpected or hazardous degree.

Our customers love this solution because it helps them maintain product shelf life, minimize product loss, and avoid energy loss.

SUSTAINABILITY IMPROVEMENT SOLUTIONS

HVAC and Lighting Optimization

With our AI technology and your existing security cameras, our AI automates lighting and the HVAC adjustment based on where people are.

Our customers love this solution because it helps them reduce energy loss and lower energy costs.

PROCESS OPTIMIZATION SOLUTIONS

Shopping Cart and Mobility Scooter Management

By leveraging your existing security cameras, we send you alerts before your shopping cart section runs out of shopping carts and mobility scooters, so that your trusted associates can replace them in time.

Our customers love this solution because it helps their associates focus on more productive tasks and ensures customer satisfaction by assisting them with always having shopping carts and mobility scooters available.

PROCESS OPTIMIZATION SOLUTIONS

Automated Pre-registry of Patients

Our patient registry station automates the patient intake process for pharmacy patients. It provides digital intake forms, captures patient prescriptions, verifies government-issued IDs, and automates queue management.

Our customers love this solution because it helps them enhance the patient experience while keeping patient data secure and preparing more prescriptions in less time.

PROCESS OPTIMIZATION SOLUTIONS

Automated Vendor Management

Our vendor management solution automates the inbound and outbound registration and sign-in/out processes for vendors, enables vendor pre-registration, and provides digital or printed entry passes.

Our customers love this solution because it helps them keep digital records of vendors' entry, and verifies vendor commitments, compliances while keeping data secure and private. It also reduces the revenue loss resulted from record discrepancies between the shipper and receiver.

PROCESS OPTIMIZATION SOLUTIONS

Public Washroom Cleaning On-Demand

Using anonymous radar sensors installed inside the washrooms, we can tell you how many people have used the washrooms and when cleaning is needed. Our AI helps you schedule cleaning crews when they are needed.

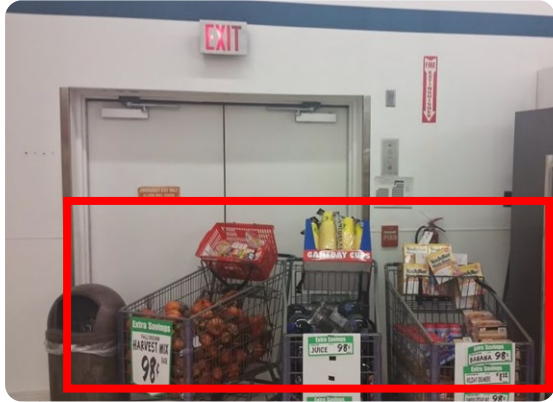

HEALTH & SAFETY SOLUTIONS

Early Smoke Detection

Using existing security cameras, our AI sends you alerts when smoke is detected and before smoke sensors are activated.

Our customers love this solution because it helps them avoid work interruptions and potential fire damages.

HEALTH & SAFETY SOLUTIONS

Emergency Exit Blockage Detection

With our AI technology and your existing security cameras, we send you alerts when emergency exits are blocked.

Our customers love this solution because it helps them create a safer facility and avoid fines and charges.

LOSS PREVENTION SOLUTIONS

Real-time Self Checkout Monitoring

Using existing security cameras, our AI sends you alerts when shopping cart items are not all scanned.

Our customers love this solution because it helps them reduce theft and prevent loss.

We are looking forward to learning about your top operational challenges and to explore which EAIGLE solutions align with your AI strategy.
